### DESCRIPTION AND PURPOSE OF CHANGE:

Because of a database mismatch, Würth Elektronik is correcting the design of caps on the datasheet. Both shape & dimensions are corrected.

This is a datasheet correction only. There will be no change in form, fit, function, quality or reliability of the product.

The design of the cap is currently the one with wings (11.24 mm large) and will stay so. This design allows the parts to be more stable inside the reel cavities and avoid them flipping in the cavities which made them impossible to process with pick & place machine.
