

CALIFORNIA STATE - PROPOSITION 65

WHAT IS CALIFORNIA'S PROP 65?

Proposition 65 or Prop 65, officially known as the California Safe Drinking Water and Toxic Enforcement Act of 1986, was enacted as a ballot initiative in November 1986 ([Safe Drinking Water and Toxic Enforcement Act of 1986](#)). The proposition protects the California state's drinking water sources from being contaminated with chemicals known to cause cancer, birth defects or other reproductive harm.

WHAT ARE THE REQUIREMENTS OF PROP 65?

Proposition 65 requires California State to maintain and update a list of chemicals known to cause cancer or reproductive toxicity. The recent regulations updated the content of the Prop 65 warning label that appears on products, in addition to other substantive changes.

Proposition 65 applies only to exposures to listed chemicals (<https://oehha.ca.gov/proposition-65/proposition-65-list>). It does not ban or restrict the use of any given chemicals.

A warning is not required if the exposures pose no significant risk of cancer or produce no observable reproductive effect. (<http://www.oehha.ca.gov/prop65/getNSRLs.html>).

COMPLIANCE OF FINDER PRODUCTS

Finder declares that its products comply with Proposition 65.

The products could contain some chemicals listed under Proposition 65 (see table below).

Professionals install Finder products within enclosures.

A warning label is not required because the anticipated exposure level will not pose a significant risk of cancer or reproductive harm.

<i>Chemical</i>	<i>Type of Toxicity</i>	<i>Listing Mechanism</i>	<i>CAS No.</i>	<i>Date Listed</i>	<i>NSRL or MADL (µg/day)^a</i>
Acrylonitrile	Cancer	FR	107-13-1	1-Jul-1987	0.7
Bisphenol A (BPA)	Female Reproductive Toxicity	SQE	80-05-7	11-May-2015	3 (dermal exposure from solid materials)
Cadmium	Cancer	SQE		1-Oct-1987	0.05 (inhalation)
Lead	Cancer	AB	-	01-Oct-1992	15 (oral)
Nickel (Metallic)	Cancer	LC	7440-02-0	01-Oct-1989	
Styrene	Cancer	AB	100-42-5	22-Apr-2016	27

No Significant Risk Levels (NSRLs) for Carcinogens and Maximum Allowable Dose Levels (MADLs) for Chemicals Causing Reproductive Toxicity

Finder will continue to monitor Proposition 65 regulations for new chemicals and compare the raw materials in finished products to insure compliance with Proposition 65.
