Subject: Product Change Notification

Dear Partner,

Telit would like to inform that a new manufacturing site has been activated for the following modules:

- **Jupiter SE880**

SEMCO (Philippines) is one of Telit's manufacturing facility for our cellular modules.

As a consequence, the packaging of the Jupiter SE880 has been updated in order to comply with the new logistic requirements as well as sales demand.

The Jupiter SE880 is now available in two different packaging, both in Tape&Reel but with different size:

- 4,000-pcs reel with Multi-box of 20,000 pcs
- 500-pcs mini-reel (MOQ) with Multi-box of 2,500 pcs

Labels layouts remain unchanged except for the new "Made in Philippines".

It could happen that for a transition period modules with new and old "Made in" would be shipped out.

This update will affect the coding system of the Jupiter SE880, the old P/Ns and the correspondent new P/Ns are listed below:

Product Name	Description	Old P/N (ROM2.2)	Replacement P/N (ROM2.2)
SE880	<i>Tape&Reel 4000 pcs</i>	SE880GPSR22R001	SE880GPSR22R002
	<i>Tape&Reel 500 pcs</i>	-	SE880GPSR22R003

Please contact your regional Telit Application Engineering Team at TS-EMEA@telit.com, TSAPAC@telit.com, TS-NORTHAMERICA@telit.com, TS-LATINAMERICA@telit.com for any technical questions.

For any additional information regarding this notice please contact your Regional Sales Director.

Best regards,

Marco Contento
Manager, Product Management EMEA
